

The real beauty of New Artshield it never scratches.

Of course you can scratch new Artshield, but you have to try really hard - all those worries about handling plastics are a thing of the past with new Artshield.

- The new Artshield range of plastic glazing:
- ◆ Over 30 times the scratch and abrasion resistance of uncoated plastics.
 - ◆ Many times the impact resistance of glass - safe!
 - ◆ Crystal clear and waterwhite - no colour shift!
 - ◆ Less than half the weight of glass - great for large frames
 - ◆ Resistant to most chemicals and cleaners.
 - ◆ Tough coatings virtually eliminate static too!

New Artshield is 3mm thick and available in the following finishes:

- ◆ Clear ◆ Clear UV (filters 99% UV) ◆ Diffused reflection.

When the going gets tough - you'd better have Artshield in the frame!
